INDEX TO THE PROCEEDINGS OF THE ENTOMOLOGICAL SOCIETY OF BRITISH COLUMBIA

Volumes 1 - 10 (Old Series); 1 - 50 (New Series)
1906 - 1954

Compiled by C. V. G. Morgan and M. D. Proverbs

The Proceedings of the Entomological Society of British Columbia were first published as Quarterly Bulletins. Ten issues, designated as numbers, were printed between March, 1906, and June, 1908. Publication lapsed until 1911 when a new series, starting with Number 1, was issued. Since then publications have been numbered consecutively but after Number 38 they were known as volumes. Numbers 13 and 15 were issued in one publication; likewise numbers 17 and 19.

This is the first published index to the Proceedings of the Entomological Society of British Columbia. It is composed of two parts; a subject index and an author index. Each is arranged alphabetically.

The subject index is based upon an analysis of each published paper, not merely the title. In general, indexing was done under the scientific or common name cited in the text. No attempt was made to select the name considered correct or in current use. Names which appeared to be spelled incorrectly were checked against an authoritative list; otherwise no interpretations were made. In this index all publications are referred to as volumes: those published before 1911 are called the 'old series' and those after that date the 'new series'. A hypothetical entry in the subject index, for example,

Anarsia lineatella
Biology 3a:2,5; 7:11; 17&19:171-181

is interpreted as follows: the biology of Anarsia lineatella is found in volume 3 of the old series (an "a" immediately following the first figure indicates that the volume is one of the old series), pages 2 and 5; volume 7 of the new series, page 11; and volume 17 and 19 of the new series, pages 177 to 181 inclusive.

Both senior and junior contributors are included in the author index but joint authorship is not indicated. The form of reference is: the year the meeting was held (not the year of publication printed on the volume); the volume number, followed by the letter "a" if it occurred in the old series; and the number of the first page of the paper. The year of publication printed on the volume is not always correct as indicated by Leech, H. B., 1941:38:29.

R. S. Downing and D. P. Pielou assisted in proofreading. The index was typed by Miss Elizabeth Theed. J. Marshall's liaison efforts made possible its publication. Thanks are due G. Parker, Head, Biographic Unit, Science Service, Department of Agriculture, Ottawa, and J. S. McGiffin, Chief, Publications Division, Information Service, Department of Agriculture, Ottawa, for photographing and printing the index.
